DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9, and 14, drawn to a transgenic plant, a method of producing oil or a method of producing high oil phenotype in a plant comprising a nucleotide sequence encoding a HIO32.3 polypeptide.

Group II, claim(s) 10-12, drawn to a method of generating a plant having high oil phenotype comprising identifying a plant that has an allele or mutation in its HIO32.3 gene, or wherein the method employs candidate gene/QTL or TILLING technology.

Group III, claim(s) 13 and 15, drawn to meal, food or feed.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking Groups I-III appears to be a nucleotide sequence encoding a HIO32.3 polypeptide or an ortholog thereof. However, Town et al. (NCBI, GenBank Sequence Accession No. NP_197639, pages 1-3, Published January 10, 2002) teach a nucleotide sequence encoding a poly ADP-ribose polymerase which is an ortholog of instantly claimed HIO32.3 polypeptide. See pages 1-3.

Therefore, the technical feature linking the inventions of Groups I-III does not constitute a special technical feature as defined by PCT Rule 13.2, as it does not define a contribution over the prior art.

Accordingly, Groups I-III are not so linked by the same or a corresponding special technical feature as to form a single general inventive concept.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be

traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
